

PRASAD SHINDE

Boston, MA · [\(857\) 317-9671](tel:8573179671) · shinde.pras@northeastern.edu · [linkedin.com/in/prasadshinde5](https://www.linkedin.com/in/prasadshinde5)

MS Information Systems student at Northeastern University with 2+ years of Product Management experience spanning EdTech and Cybersecurity. Currently completing an 8-month co-op as a Product Management Intern at RoonCyber Inc., owning documentation, QA validation, and customer feedback synthesis for a Runtime CNAPP with AI Workload Protection. Experienced in writing PRDs, managing Jira backlogs, conducting competitive research, and creating user-facing and internal documentation.

WORK EXPERIENCE

RoonCyber Inc. - a cybersecurity company building a Runtime CNAPP with AI Workload Protection. Boulder, CO
Product Management Intern January 2026 – August 2026

- Drove end-to-end documentation for an AI-powered CNAPP product, translating engineering discussions and meeting notes into structured PRDs, epics, user stories, and acceptance criteria used across product and engineering workflows.
- Built and maintained customer-facing onboarding guides, step-by-step walkthroughs, FAQs, and feature explainers tailored to technical and security personas, improving product clarity at handoff.
- Synthesized qualitative insights from customer calls and feedback channels into prioritized themes - covering usability friction, feature requests, and terminology gaps - and mapped findings to personas and product areas.
- Conducted competitive and industry research across CNAPP, AI workload security, and cloud-native security domains; summarized capability benchmarks, UX patterns, and positioning insights to support roadmap decisions.
- Owned QA and feature validation by running exploratory testing across user roles and workflows, documenting findings with screenshots and structured notes, and confirming acceptance criteria before development handoffs.
- Maintained Jira backlog hygiene by ensuring tickets were clear, complete, and aligned to team conventions; preserved traceability between roadmap items, requirements, and Jira artifacts.
- Reviewed available usage signals and flagged documentation or guidance gaps, contributing to proactive improvements in onboarding clarity and feature discoverability.

Trainity - an Ed-Tech startup offering analytics and digital marketing courses. Bengaluru, India
Analytics Product Manager September 2022 – January 2024

- Launched a Data Analytics course for 2,000+ students, driving a 20% increase in enrollments and 15% higher retention.
- Designed interactive wireframes and prototypes in Figma, improving usability and boosting course completion by 10%.
- Led cross-functional collaboration with Engineering, Design, and Marketing teams to deliver six training programs, expanding the Product Portfolio by 30% within six months.
- Applied prioritization frameworks (RICE) to align feature delivery with user feedback and strategic goals.
- Conducted User Research and implemented feedback-driven updates, boosting feature adoption rates by 25%.
- Analyzed datasets of over 50,000 rows using SQL and Excel, creating dashboards in Tableau that reduced reporting time by 30% and improved decision-making efficiency for key stakeholders.
- Collaborated with 10+ stakeholders to gather and document Business Requirements, creating BRDs that increased project clarity and reduced development cycle rework by 20%.
- Optimized business processes with TO-BE workflows in Lucidchart, cutting manual effort by 25%.

EDUCATION

Northeastern University – Boston, MA Expected December 2026
Master of Science in Information Systems

Relevant Coursework: Application Engineering and Development, Business Analysis and Information Engineering, Web Design and UX Engineering, UX Design and Testing, Branding and AI, Software Quality Control and Management

University of Mumbai – Mumbai, India August 2018 – July 2021
Bachelor of Engineering in Computer Science

SKILLS

Tools: Jira, Trello, Figma, Miro, Slack, Confluence, GitHub, Microsoft Office Suite, Tableau, Power BI, Google Workspace, Lean, Agile (Scrum, Kanban)
Programming: SQL/MYSQL, Python, Java, HTML, CSS, Bootstrap, JavaScript, React, Angular, Node.js, NoSQL, Pandas

PROJECTS

Gaming Community Hub - Product Manager (Case Study) [\[Link\]](#)

- Authored PRD for cross-game social hub (friends, feed, challenges), benchmarking competitors and defining success metrics (+10% DAU, +10% ARPU).

Craigslist Redesign - UX Designer (Case Study) [\[Link\]](#)

- Conducted user research and redesigned navigation/UI in Figma, reducing visual clutter and improving task completion efficiency by 35% in usability testing.

Job Portal App - Full-Stack Developer (MERN/Vite) [\[Link\]](#)

- Designed and developed a role-based web application with employee and admin portals, enabling job posting, application tracking, and user management; tested APIs with Postman to ensure reliability and scalability.

CERTIFICATES AND AWARDS

- Attained Software Product Management [Certification](#) from University of Alberta
- Attained Project Management Professional [Certification](#) from Google
